RE: tower registration BPTTA-20060324AAQ

Dear Hossein Hashemzadeh,

The following application needs correction for KVBI-TV, channel 42 in Lewiston, Idaho. When the application was filled out, two mistakes were entered into the filing.

Correction # 1) In section III – Engineering (Analog); Tech Box # 4, the tower registration number is not accurate. In fact, the tower which is coordinated through Idaho Public Television, Rich Van Gendren (208) 373-7223; is not a tower that has a registration number.

Rich Van Gendren communicated to me that the tower has not required an FAA tower registration due to the fact that it is under 60' in height and that it passed all glide / slope requirements.

Correction # 2) In section III – Engineering (Analog); Tech Box # 8 and # 9, the ERP was listed as 3200 Kilowatts. The actual ERP is 3.2 Kilowatts.

Thank you for allowing us to amend the application.

Raymond Tucker
