

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of KTBC LICENSE, INC., licensee of KTBC in Austin, Texas, in support of this amendment to its pending Application for Construction Permit BPCDT-19991028AEL, to specify a correction in transmitter site coordinates and a decrease in effective antenna height for KTBC-DT. No change in antenna make or model or in effective radiated power is proposed herein.

Exhibit B is an elevation pattern for the originally proposed elliptically-polarized omnidirectional antenna. Exhibit C is a map upon which the predicted service contours are plotted. As shown, the city of license is completely contained within the proposed 48 dBu service contour. A power density calculation is provided in Exhibit D.

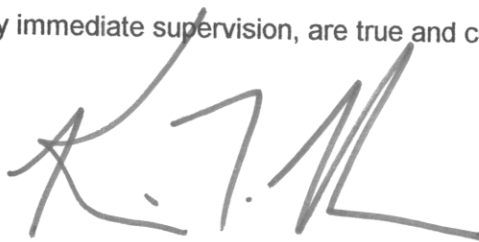

It is important to note that the instant proposal meets all of the requirements of a "checklist" application (i.e. the proposed site is within five kilometers of that allotted to KTBC-DT and the proposed 41 dBu contour is completely contained within that allotted to this station). In addition, because the amended 41 dBu contour lies wholly within that originally proposed in BPCDT-19991028AEL, this filing meets the terms of the current FCC application filing "freeze". As a result, no interference study has been provided.

It is not expected that the proposed facility would cause objectionable interference to any other broadcast or non-broadcast station authorized to operate at or near the KTBC-DT site. However, if such should occur, the owner of KTBC-DT recognizes its obligation to take whatever corrective actions are necessary.

EXHIBIT A

Since no change in the overall height or location of the existing tower is proposed herein, the FAA has not been notified of this application. In addition, the FCC issued Antenna Structure Registration Number 1043248 to this tower.

I declare under penalty of perjury that the foregoing statements and the attached exhibits, which were prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.

A handwritten signature in black ink, appearing to read 'K. T. Fisher', with a stylized, sweeping flourish at the end.

KEVIN T. FISHER
