Re: WUSF(FM), Tampa, Florida
University of South Florida
Facility ID No. 69122
File No. 20160407AAY

**Request for Extension of
Experimental Authority**

Dear Counsel:

The staff has under consideration the above-referenced April 7, 2016, request for extension of experimental authority 20150317ABS¹ (Extension Request), submitted on behalf of the University of South Florida (USF), licensee of noncommercial educational FM Station WUSF(FM), Tampa, Florida,² to permit Station WUSF(FM) to continue to conduct testing of hybrid digital FM in-band on-channel (IBOC) operation using asymmetric power levels in the digital sidebands. The experimental authority is requested pursuant to Section 5.203 of the Commission's Rules.³

In the Extension Request, USF is seeking extension of its current experimental authority which permits operation of Station WUSF(FM) with lower sideband (LSB) digital effective radiated power (ERP) of -11 dBc⁴ and upper sideband (USB) digital ERP of -14 dBc. In support of the Extension Request, as required, USF submitted an interim report detailing the methodology employed and the progress and results of its testing under its current experimental authorization. USF states that Station WUSF(FM) has operated its digital facilities since commencing operation pursuant to its current experimental authority in April 2015 without any complaints of interference. Additionally, USF reports that operation with increased digital power in the Station WUSF(FM) LSB has allowed the station to provide digital service to listeners within its protected coverage area who were unable to receive the Station WUSF(FM) digital signal prior to the increase in LSB digital power.

¹ File Number 20150317ABS.

² File Number BMLED-20080723AAU.

³ 47 CFR § 5.203 (Section 5.203).

⁴ Decibels relative to analog carrier.

Our review indicates that the proposed Station WUSF(FM) experimental operation complies with the contour nonoverlap and other technical requirements of the Media Bureau's Order, adopted January 27, 2010, in Mass Media Docket No. 99-325,⁵ and the request for experimental authority meets the requirements for experimental operations set forth in Section 5.203. Accordingly, the request is **HEREBY GRANTED**. Station WUSF(FM) may operate with analog and digital ERP as follows:

| | |
|------------------|--|
| Analog ERP: | 72 kilowatts (kW) Max-BT, H&V ⁶ |
| LSB Digital ERP: | 2.85 kW |
| USB Digital ERP: | 1.45 kW. |

This experimental authority expires on **April 13, 2017**. This authority is specifically conditioned on the lack of objectionable interference. It will be necessary to reduce digital power or cease digital operation if complaints of interference are received. A report detailing the methodology employed and the results obtained must be submitted within 90 days following the conclusion of the experimental operation pursuant to Section 5.203(d) of the Commission's Rules.⁷ The report should describe the test procedures in detail, should identify those adjacent channel stations vulnerable to interference, and note any interference observed during the tests. The report should also characterize the observed changes in digital coverage.

Any request for extensions of this authority should be filed at least 30 days prior to the expiration date, and must include an interim version of the aforementioned report that details the progress of the experimental program as of the filing date of the request.

Sincerely,

Susan N. Crawford
