

WODS Antenna Relocation Discussion

CBS Radio East Inc., (CBS), licensee of WODS(FM) 277B, Boston, MA., seeks to relocate its transmitter to a master antenna located on the Prudential Building in Boston. The station will remain fully spaced per 47 C.F.R. Section 73.207.

The master FM antenna is currently used by stations WZLX, WBCN, WMJX and WXKS-FM. WODS proposes to utilize a vacant port on the combiner. Harmonic measurements will be made with the results submitted as part of the license application.

A revised RFR study will also be made to confirm continued compliance with the Commission's rules regarding maximum permissible exposure to workers and the general public.
