**July 2016**

**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Cumulus Licensing LLC (“Cumulus”), licensee of FM translator W278AJ, Channel 278D, Blacksburg, Virginia. Cumulus has a construction permit to make minor changes in the W278AJ facilities (BPFT-20160114AAN). This instant application seeks a license to cover the outstanding permit. Exhibit A is a calculation of the transmitter power output for FM translator W278AJ.

There are two special operating conditions/restrictions listed on the W278AJ permit. The first condition states:

*“Prior to commencing program test operations, FM Translator or FM Booster permittee must have on file at the Commission, FCC Form 350, Application for an FM Translator or FM Booster Station License, pursuant to 47 C.F.R. Section 74.14.”*

This application satisfies that condition.

The second condition states:

*“The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radio frequency electromagnetic fields in excess of FCC guidelines.”*

Cumulus states that it will reduce the power of W278AJ or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio frequency electromagnetic fields in excess of the FCC’s guidelines. Based on the foregoing, it is believed that Cumulus has complied with all conditions and can operate W278AJ in accordance with Commission’s rules.
