

EXHIBIT 11

This narrative exhibit is submitted to demonstrate that the instant proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules. Attached at exhibit 12 are a spacing study, an additional narrative exhibit which includes a Section 74.1204(d) showing, and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but four other FM facilities. The attached maps and Section 74.1204(d) study with regard to overlap between this proposal and the coverage contour of WBBI, Endwell, NY demonstrate that there is no prohibited contour overlap between these four facilities and the instant proposed FM translator facilities. One currently operating translator (there is a second record for a power upgrade for this translator listed) and one new proposed translator have also been included on the maps because of their proximity to the proposed facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The six facilities that have been included on the attached maps are: WPHR, 106.9, Auburn, NY (54 dBu contour to proposed 48 dBu interference contour); WBBI, 107.5, Endwell, NY (60 dBu contour to prop. 100 dBu int. contour); Vacant New, 107.1, Livingston Manor, NY (60 dBu contour to prop. 40 dBu int. contour); WLIH, 107.1, Whitneyville, PA (60 dBu contour to prop. 40 dBu int. contour); W293AC, 106.5, Binghamton, NY (two 60 dBu contours to prop. 100 dBu int. contour); and Proposed Translator, 107.1, Athens, PA (60 dBu contour to prop. 40 dBu int. contour). WCDW 107.1 Endwell, NY Interference Analysis, Blown Up Scale will show more clearly, with a blown up scale, that there is no prohibited overlap between this proposal's 100 dBu interference contour and the 60 dBu

contours of W293AC, 106.5, Binghamton, NY. WCDW 107.1 Endwell, NY 74.1204(d)

Narrative and its related maps are included to show allowable overlap under Section 74.1204(d) with this proposal's 123 dBu interference contour and the 83 dBu coverage contour of WBBI, Endwell, NY. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
