

**MINOR CHANGE APPLICATION/
CORRECTION OF COORDINATES
CUMULUS LICENSING LLC
WGLF RADIO STATION
CH 281C0 - 104.1 MHZ - 100.0W
TALLAHASSEE, FLORIDA
July 2008**

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Cumulus Licensing LLC ("Cumulus"), licensee of station WGLF, Channel 281C, Tallahassee, Florida. Cumulus recently discovered that the coordinates listed on the WGLF FCC license and Antenna Structure Registration are both at variance with the actual location of the tower on which the WGLF antenna is located. Therefore, this instant application proposes to correct the coordinates, ground elevation and center of radiation above ground (and height above average terrain) of WGLF.¹ No actual construction is proposed. The change in calculated height above average terrain (and the slight adjustment of site elevation, center of radiation above ground and coordinate correction) is based on the use of the 30 second terrain database, in lieu of the originally calculated method. As a result of the calculated height above average terrain, WGLF's operating facility is considered a Class C0, rather than Class C. A separate application seeking to maintain Class C status is being submitted to the Commission for consideration.

1) This correction is greater than 3 seconds in coordinates. The correction will also require FAA approval. A separate independent application is also being prepared to maintain a Class C facility for WGLF.

While no actual changes are being made to the operating WGLF facility, the location of the tower needs to be corrected with the Federal Aviation Administration ("FAA"). Therefore, the FAA has been apprised of this proposal. Once the FAA issues a Determination of No Hazard for the corrected tower data, Antenna Structure Registration Number 1061964 will be updated to reflect the updated data.

All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to Cumulus and is available to the Commission upon request.²

2) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All other necessary reviews have been or will be addressed by the applicant.
