Re: Roger L. Hoppe, II (RLH)
KLIM(AM), Limon, Colorado
Facility Identification Number: 25185
Special Temporary Authority (STA)
BESTA-20150518AFM

Dear Mr. Hoppe:

This is in reference to the request filed on May 18, 2015. RLH requests an extension of the STA granted on November 17, 2014, to operate station KLIM(AM) with temporary facilities due to loss of the licensed site in 2014.¹ In support of the request, RLH states that in the past six month STA period it has continued to search for a new transmitter site.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for STA is GRANTED. Station KLIM(AM) may operate with the following facilities:

| | |
|-----------------------------|--|
| Geographic coordinates | 39° 16' 00" N, 103° 41' 15" W (NAD 1927) |
| Frequency | 1220 kHz |
| Hours of operation | Daytime only |
| Operating power | 0.1 kW |
| Antenna type | existing tower of KLIM(AM)'s STL (slant fed) |
| Antenna efficiency | 42 mV/m (for 0.1 kW operation) |
| Overall height of structure | 9.1 meters (30 feet) |

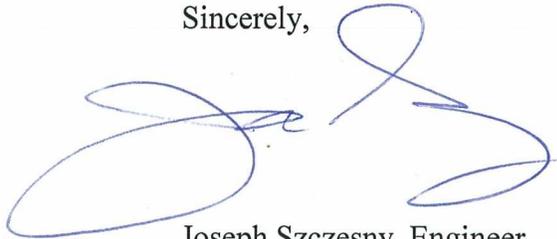

¹ KLIM(AM) is licensed for ND operation on 1220 kHz with 0.25 kW daytime-only.

We noted that CDBS indicates the station was silent for most of the five year time period from 2009 to 2014 due to technical and financial problems, and the last construction permit (BMP-20080613ACF) granted to RLH authorized a new site using a three tower directional antenna, but it was never built and expired on June 30, 2009. As a result, we recommend that RLH retain a consulting engineer now to assist in the preparation and filing of an FCC Form 301 application to propose a new ND facility (as opposed to proposing a more costly DA facility).

It will be necessary to further reduce power or cease operation if complaints of interference are received. KLIM(AM) must notify the Commission when licensed operation is restored. KLIM(AM) must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. We anticipate that KLIM will file an acceptable FCC Form 301 application before the expiration date shown below.

This authority expires on **December 9, 2015**.

Sincerely,

A handwritten signature in blue ink, consisting of several loops and a long horizontal stroke, positioned above the typed name.
