

EXHIBIT
CONSTRUCTED FACILITY

Sunshine State Television Network, Inc. notes that its predecessor, Tiger Eye Broadcasting Corporation (“Tiger Eye”) began operating displacement facilities on Channel 38 as contemplated in the construction permit underlying this license application in December 2001. However, Tiger Eye did not file an application for license to cover, apparently due to uncertainty about the then-pending Class A application and the Class A authorization subsequently granted to KOHC-LP on April 29, 2002, which was entitled “Class A Television Broadcast Station License.” (See File No. BLTTA-2001712ABB.) In the course of recent repairs and review of the files for the station, Sunshine discovered that its predecessor had not filed an additional application for a license to cover its displacement facilities. Sunshine herein requests such license. *See also* Sunshine’s request for special temporary authorization (“STA”), filed concurrently herewith.
