March 16, 2017

William Bowin
Chief Engineer
North American Broadcast Company Inc

Dear Bill:

The W230AR antenna will be located above the W287CP directional antenna. The addition of the transmission line that is to feed the W230AR antenna will be in a bundle of feed lines that will pass through the aperture of the W237CP directional antenna. The addition of the new transmission line will have no adverse effect on the W237CP directional antenna pattern.

If you need anything else, do not hesitate to contact us.

Tom Scharf

ERI Test Range
