Re: KJEE(FM), Montecito, California  
Montecito FM, Inc.  
Facility Identification Number: 43589  
Special Temporary Authority  
BESTA-20140520AHN

Dear Counsel:

This is in reference to your request filed May 20, 2014 on behalf of Montecito FM, Inc. ("MFI"). MFI requests a fifth extension of the special temporary authority ("STA") granted on December 5, 2011, to operate Station KJEE with temporary facilities.<sup>1</sup> In support of the extension request, MFI re-states that the licensed site was heavily damaged by wildfire and that MFI was required to reduce power for the protection of workers during the reconstruction efforts. In the past few days, MFI has filed a construction permit application (file no. BPH-20131120ADR) to relocate the station and upgrade to Class B1. This application is awaiting staff review.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

---

<sup>1</sup> KJEE is licensed for operation on Channel 225A (92.9 MHz) with effective radiated power of 0.82 kilowatt (H&V) and antenna height above average terrain of 270 meters. (Construction permit BPH-20070118AES expired by its own terms on January 27, 2012.)

We find that an extension of the STA is warranted bending staff action on the KJEE minor change construction permit application, and the request for extension of STA IS HEREBY GRANTED. Station KJEE may continue to operate with the following facilities:

Geographic coordinates:	34° 27' 57" N, 119° 40' 37" W (NAD 1927)
Channel	225A (92.9 MHz)
Effective radiated power:	0.2 kilowatt (H&V)
Antenna height:	
above ground:	5 meters
above mean sea level:	664 meters
above average terrain:	270 meters

MFI must notify the Commission when licensed operation is restored. MFI must use whatever means are necessary to protect workers and the public from radiofrequency exposure in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

**This authority expires on November 30, 2014.**

Sincerely,

Dale Bickel  
Senior Engineer
