

**Amendment to Pending Application BPH-20010622AAB
Minor Modification to KVLL 234C2 Wells, TX**

**Statement of “trigger” nature of this application and absence of
alternative channels**

This application seeks to “trigger” the C-zero status of station KRUF, Shreveport, LA. As such, it offers contour protection under 73.215 for a full facilities C-zero, i.e., 100KW ERP at 451 meters HAAT.

A copy of this application will be delivered to the licensee of KRUF pursuant to the rules.

A study has been made and it has been determined that there are no other channels available at this site to accommodate KVLL as a C2.
