

KYEN(FM)
Severance, CO
Proposed Minor Modification
Of Permitted Facility

Application Overview:

KYEN(FM) (FCC Facility ID# 164151) proposes to modify its currently Permitted Facilities using the following parameters:

Tech Box:

Channel:	280
Class:	C1
Antenna Coordinates:	N40-37-03, W105-19-40 (NAD 27)
Allotment Ref. Coordinates:	N40-45-52, W105-04-28 (NAD 27)
ASRN:	N/A
Tower Height AMSL:	43 m
COR AMSL:	2560 m
COR AGL:	36 m
COR HAAT:	372 m
ERP:	16.5 kW
Directional Antenna:	No

Allotment Modifications:

The Applicant respectfully requests that the community of license for KYEN(FM) be changed from Cheyenne, Wyoming, to Severance, Colorado. As such, Exhibit 1 is an allotment

reference site channel spacings study for KYEN(FM) on Channel 280C1 at Severance, CO, demonstrating that the proposed facility would be fully spaced pursuant to Section 73.207 towards all other authorizations, allotments, and proposals with the exception of KRQU(FM) 283C2 Laramie, Wyoming, from the following location:

Allotment Reference Coordinates: N40-45-52, W105-04-28 (NAD 27)

In order to eliminate the shortspacing conflict with KRQU(FM), Laramie Mountian Broadcasting, L.L.C., licensee of KRQU(FM) has contingently and contemporaneously filed its own FCC 301 Application proposing to have KRQU(FM)'s channel changed from 283C2 to its I.F. channel of 230A at a new antenna site. With KRQU(FM)'s channel changed, KYEN(FM)'s proposed community change can occur in compliance with the Commission's Rules.

Allotment Site City-Grade Coverage:

In accordance with the city grade coverage requirements of Section 73.315, Exhibit 2 demonstrates that the proposed allotment site provides requisite coverage of KYEN(FM)'s proposed new community of license – Severance, CO. As can be seen in the Exhibit, 100% of Severance's community boundaries are encompassed by the theoretical 70 dBu, circle contour. Also, no terrain obstructions are located between the antenna site and the community.

Suitable Allotment Reference Site:

In accordance with Note 1 to Section 73.3573, Exhibit 3 is a site map showing that the allotment reference site is located at a suitable location and is not offshore, in a national or state

park, on an airport or otherwise in an area which would necessarily present a hazard to air navigation.

Antenna Site City-Grade Coverage:

Exhibit 4 demonstrates that the proposed facility's antenna site provides city grade coverage of KYEN(FM)'s community of license – Severance, CO. As can be seen in the Exhibit, 100% of Severance's community boundaries are encompassed by the F(50,50) 70 dBu contour of the proposed facility. Also, no major terrain obstructions are located between the antenna site and the community.

Interference Study (Requesting Section 73.215 Contour Protection):

Exhibit 5 is a channel spacings study from the proposed KYEN(FM) antenna site. It notes that the proposed KYEN(FM) antenna site would otherwise be slightly shortspaced to:

-KYZX(FM) Pueblo West, CO 280C2 (see BLH-20070326AGF)

-KFMU-FM Oak Creek, CO on 281C3 (see BLH-19940111KC)

Therefore, the applicant requests Section 73.215 contour protection processing.

KYEN(FM) is eligible to request 73.215 Contour Protection towards KYZX(FM) as it complies with the minimum separation requirements on its co - channel at its proposed antenna site. The channel spacings study in Exhibit 5 shows that the proposed KYEN(FM) 280C1 antenna location is spaced 211.64 kilometers from the KYZX(FM) site. In order to be eligible for 73.215 Contour Protection, the minimum "C1 to C2" spacing for co - channel stations must

be at least 211 kilometers. The proposed KYEN(FM) 280C1 antenna site satisfies this requirement by 0.64 kilometers.

Using the facilities proposed herein, KYEN(FM) 280C1 complies with the contour protection requirements of Section 73.215 towards KYZX(FM). The attached overlap tabulation studies in Exhibits 5A and 5B demonstrate that this application complies with the contour protection requirements of Section 73.215.

In reviewing the attached studies, it should be noted that since KYZX(FM) is, itself, a Section 73.215 Contour Protection Station, the following overlap studies were conducted assuming "Actual" Class C2 Facilities as licensed for KYZX(FM).

Using the KYEN(FM) 280C1 technical parameters proposed in this application, Exhibit 5A demonstrates that the KYEN(FM) F(50,50) 60 dBu Protected Contour does not overlap the proposed F(50,10) 40 dBu Interfering Contour of KYZX(FM) operations on Channel 280C2. Likewise, Exhibit 5B demonstrates that the F(50,50) 60 dBu Protected Contour for KYZX(FM) does not overlap the F(50,10) 40 dBu Interfering Contour of the instant KYEN(FM) application on 280C1. Therefore, it appears as though the instant application meets the requirements of Section 73.215 towards KYZX(FM).

KYEN(FM) is eligible to request 73.215 Contour Protection towards KFMU-FM as it complies with the minimum separation requirements on its first adjacent channel at its proposed antenna site. The channel spacings study in Exhibit 5 shows that the proposed KYEN(FM) antenna location is spaced 137.96 kilometers from the KFMU-FM site. In order to be eligible for

73.215 Contour Protection, the minimum “C1 to C3” spacing for first adjacent channel stations must be at least 133 kilometers. The proposed KYEN(FM) antenna site satisfies this requirement by 4.96 kilometers.

Using the facilities proposed herein, KYEN(FM) complies with the contour protection requirements of Section 73.215 towards KFMU-FM. The attached overlap tabulation studies in Exhibits 5C and 5D demonstrate that this application complies with the contour protection requirements of Section 73.215.

In reviewing the attached studies, it should be noted that since KFMU-FM is, itself, a Section 73.215 Contour Protection Station, the following overlap studies were conducted assuming the “Actual” licensed Class C3 Facilities for KFMU-FM.

Using the KYEN(FM) technical parameters proposed in this application, Exhibit 5C demonstrates that the KYEN(FM) F(50,50) 60 dBu Protected Contour does not overlap the proposed F(50,10) 54 dBu Interfering Contour of KFMU-FM operations on Channel 281C3. Likewise, Exhibit 5D demonstrates that the F(50,50) 60 dBu Protected Contour for KFMU-FM does not overlap the F(50,10) 54 dBu Interfering Contour of the instant KYEN(FM) application on 280C1. Therefore, it appears as though the instant application meets the requirements of Section 73.215 towards KFMU-FM.

Downward Radiation Study (FM Model):

The proposed FM Facility has been evaluated in terms of potential radiofrequency electromagnetic field exposure at ground level in accordance with OET Bulletin No. 65,

Evaluating Compliance with FCC Specified Guidelines for Human Exposure to Radiofrequency Electromagnetic Fields (OET Bulletin 65, Second Edition 97-01, August, 1997). The Commission's FM Model Power Density Prediction program was employed to determine the Field. Using the ERI SHPX Rototiller antenna with 8 sections and half wavelength spacing, and the AGL height and ERP proposed in this application, the highest predicted power density 2 meters above ground is less than 3.1% of the Uncontrolled Standard with a Power Density of 6.14 microwatts per square centimeter 272 meters from the base of the tower.

Although KYEN(FM)'s downward RFR contribution at the site will be negligible, due to the fact that several existing and proposed emitters are located at or near the site, the applicant, if requested by the Commission, agrees to conduct a Radiofrequency Electromagnetic Field survey at the site upon construction of the proposed facility to ensure that any areas at ground level that exceed the Commission's exposure guideline values are appropriately marked and fenced.

Even though the site will fully comply with the Uncontrolled Site Standards, access to the transmitting site will be restricted and appropriately marked with warning signs. When it becomes necessary for workers to ascend the tower, appropriate measures, such as reduction or shut down of power if necessary, shall be taken to ensure that the human exposure to radiofrequency radiation will not exceed the FCC guidelines.

Existing Tower:

The proposed facility is exempt from environmental processing because the facility is not located at a location specified in Section 1.1307(a)(1)-(8) of the Commission's Rules and since the tower in question already exists.
