

## EXHIBIT 11

This narrative exhibit is submitted to demonstrate that the instant proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules. Attached at exhibit 12 are a spacing study, an additional narrative exhibit which includes a Section 74.1204(d) showing, and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but three other FM facilities. The attached maps and Section 74.1204(d) study with regard to overlap between this proposal and the coverage contour of WVLY-FM, Milton, PA demonstrate that there is no prohibited contour overlap between these three facilities and the instant proposed FM translator facilities. One licensed FM translator has also been included on the maps because of its proximity to the proposed facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The four facilities that have been included on the attached maps are: WYGL-FM, 100.5, Elizabethville, PA (60 dBu contour to proposed 40 dBu interference contour); WVLY-FM, 100.9, Milton, PA (60 dBu contour to prop. 100 dBu int. contour); WHGL-FM, 100.3, Canton, PA (two 57 dBu contours to prop. 51 dBu int. contour); and W263AG, 100.5, South Williamsport, PA (60 dBu contour to prop. 40 dBu int. contour). W261CA 100.5 Lewisburg, PA 74.1204(d) Narrative and its related maps are included to show allowable overlap under Section 74.1204(d) with this proposal's 122 dBu interference contour and the 82 dBu coverage contour of WVLY-FM, Milton, PA. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
