

Exhibit E-1  
Technical Summary  
New FM Station  
Channel 229C3  
Cheyenne, Wyoming.  
December 2004

This application is being made in response to a winning bid in FCC broadcast auction number 83 for a new FM station for Cheyenne, Wyoming on channel 229A.

This application is being made on behalf of White Park Broadcasting, Inc. (White Park). White Park is seeking to locate this new station at the existing tower location of KRRR Cheyenne, Wyoming operating on channel 285C2. KRRR is owned by Brahmin Broadcasting Corporation, which is under common ownership with White Park.

White Park is seeking to co-locate its new transmitter antenna with KRRR. It is proposing to mount the transmitting antenna at the same center of radiation height as KRRR, but on the opposite side of the tower. Bandpass Cavity filters will be utilized by both KRRR and the new station on the output of its respective transmitters, to eliminate any intermodulation interference generated by the close proximity and the mutual coupling of the two antenna systems.

White Park is proposing the one step upgrade of this allotment from channel 229A to channel 229C3. The proposed site meets all of the required spacing under the provisions of 73.207.
