American Family Radio
P.O. Drawer 3206
Tupelo, MS 38803

To whom it may concern

B & H Tower Services did install one 6810-6 bay shively antenna at a C.O.R. of 370' on guyed tower located approximately 2 miles ESE of Macon, GA. The antenna was directed at an azimuth of 118 degrees and installed per directions accompanying the antenna from Shively. The azimuth of the antenna was verified by a surveyor before B & H Tower left the job site.

B & H Tower Services was started in 1994 and has completed hundreds of jobs across the United States for companies such as American Family Radio, Sprint PCS, Nextel, Powertel, DXC Communications, Alltel, AT&T, National Weather Service, Cellular One and more. We have experience in numerous types of antenna installations including directional and omni-directional FM antennas, directional and omni-directional PCS and cellular antennas, microwave, television and two-way radio antennas.

The crew leader on the Heber Springs, AR job was Stephen Fraley, a foreman for B & H Tower Service since 1995.

Sincerely,
Mark Black
