

ENGINEERING STATEMENT OF JOEL T. SAXBERG

This engineering statement was prepared for Emmis Radio License, LLC, licensee of FM station KZLA-FM, CH 230B, Los Angeles, California, by Joel T. Saxberg of Beem Co.

SUPERVISION OF NEW TOWER AND ANTENNA – I was retained by Emmis Radio as Project Manager for their new support structure and antenna on Mt. Wilson. I made frequent site visits and was at the site when the new ERI Model 1182-2CP-DA antenna was installed. I handed the riggers the manufacturer's installation drawing and observed the installation process. Afterwards, I used a Brunton compass with tripod to verify that the azimuth was properly set. A licensed surveyor, Mr. Aaron G. Byrd, performed a precision alignment of the KZLA directional antenna. The antenna is now installed according to the manufacturer's instructions. My qualifications are a matter of record and are included on the following "Engineering Certification" page.
