

## **Request for Special Temporary Authority**

Sentry Communications License, L.L.C. ("Licensee"), the licensee of FM translator station W282BE (to be W281AR), 104.1 MHz, Williamsport, Pennsylvania (FIN 141440) (BPFT-20080326AEG) and AM station WLYC(AM), 1050 kHz, Williamsport, PA (FIN 52187), hereby requests that the Commission grant special temporary authority for W282BE (to be W281AR) to rebroadcast WLYC(AM), consistent with footnote 19 of the Commission's Notice of Proposed Rule Making in "In re Amendment of Service and Eligibility Rules for FM Broadcast Translator Stations", MB Docket No. 07-172, RM-11338, FCC 07-144, released August 15, 2007 ("STA").

The grant of this STA request will serve the public interest by permitting the Licensee to provide fill-in service within the WLYC(AM) service area. The use of W282BE (to be W281AR) to rebroadcast WLYC(AM) will permit the Licensee to provide improved service within the coverage area for WLYC(AM), particularly during the nighttime hours as WLYC(AM) operates within only 30 watts at night. In accordance with the amended rules proposed in the above-referenced rule making docket, attached is a contour study showing that the 60 dBu contour of W282BE (to be W281AR) (under BPFT-20080326AEG) is well within the 2 mV/m groundwave contour of WLYC(AM) as well as within the 25 mile radius around the WLYC(AM) transmitter site. It should be noted that this STA references the W282BE (to be W281AR) 60 dBu coverage area under granted construction permit BPFT-20080326AEG and this STA will not be effectuated until the consummation of operations under BPFT-20080326AEG and the filing of a Form 350 License to Cover.
