[Return to Radio Stations home page](#)

For Arbitron surveys conducted in the U.S., each Arbitron radio market is composed of up to two geographic areas: the Metro Survey Area (Metro) and the Total Survey Area (TSA).

The Metro includes one or more counties and is the primary survey area. The TSA includes all of the counties in the Metro as well as one or more non-Metro counties contiguous to the Metro area. Essentially, non-Metro TSA counties are areas where local residents can hear neighboring local radio stations.

Arbitron market definitions are relatively static. When there is a market redefinition, it is implemented in either the Spring or Fall surveys. For a full description of how Arbitron defines and updates its markets, please see our [Description of Methodology](#).

For more information on zip codes or cities, [call your Arbitron representative](#).
