

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
FIRST BROADCASTING INVESTMENT PARTNERS, LLC

This statement and the attached figures were prepared on behalf of First Broadcasting Investment Partners, LLC (herein "First"). First proposes the modification of the technical facilities of radio station KAZZ(FM) at Deer Park, Washington. In support of this application, this Technical Statement has been prepared to address the Commission's multiple ownership requirements given the other stations in which First, or any party holding an attributable interest in First, holds or proposes to hold an attributable interest. Neither First, nor any entity with an attributable interest in First, holds an attributable interest in any broadcast license where the appropriate contour of which overlaps with the predicted 1 mV/m contour or principal community contour of KAZZ(FM), except KAYU-TV.

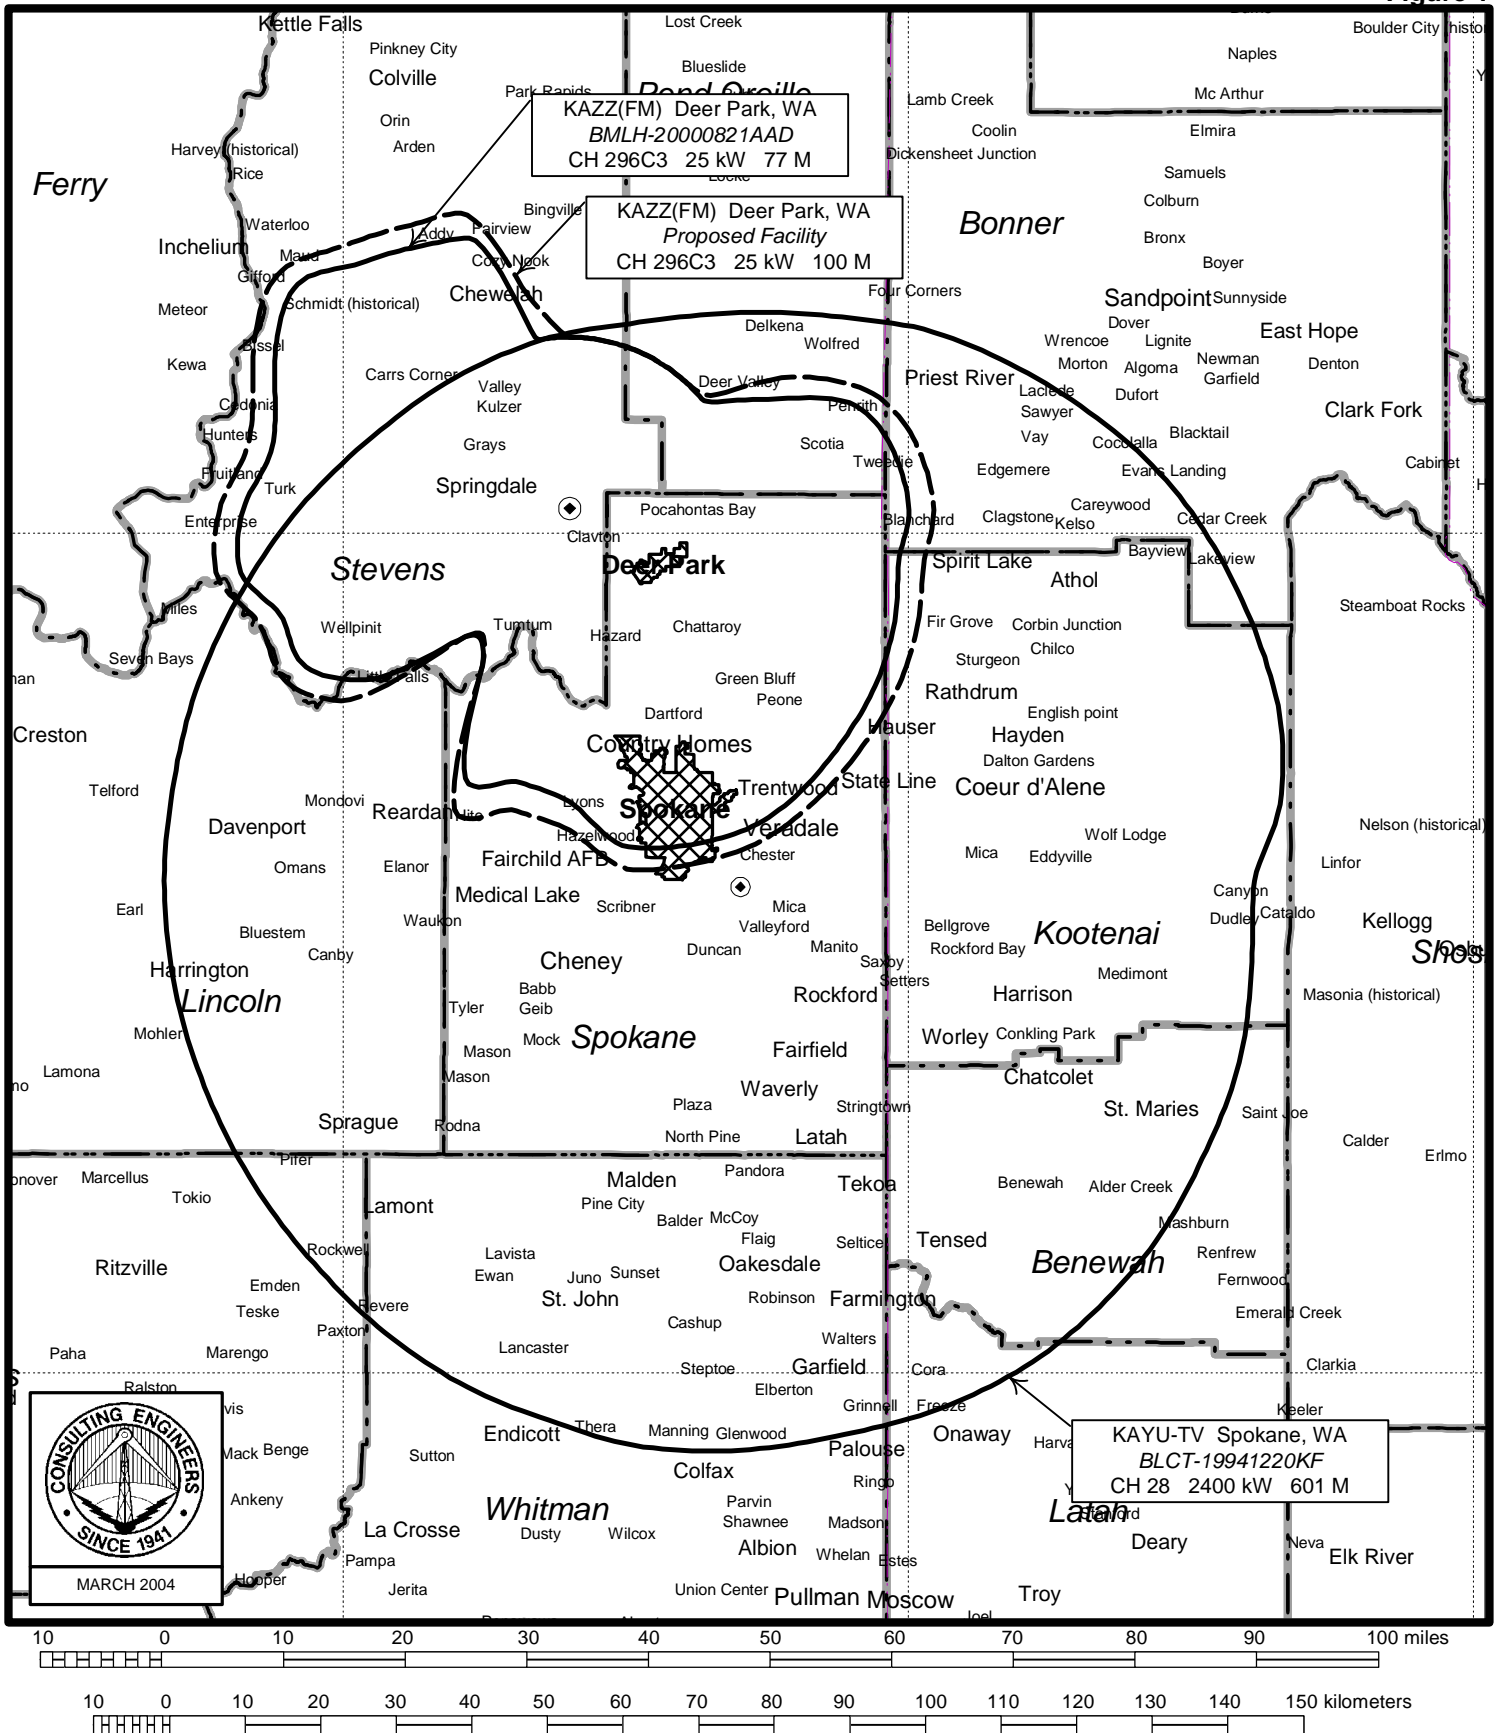

Figure 1 is a map showing the contours appropriate for the Television/Radio cross ownership analysis for KAZZ(FM) and KAYU-TV. As can be seen, the Grade A contour of television station KAYU-TV entirely encompasses the KAZZ(FM) community of license, Deer Park, Washington. However, neither the 1 mV/m contours of the licensed or proposed KAZZ(FM) entirely encompasses the KAYU-TV community of license, Spokane, Washington.
