

## Exhibit 1

### Amendment to Application for Construction Permit BP-20071119AEZ

#### KPTK-AM 1090 kHz Seattle, WA

This amendment corrects a typographical error in question 5 (nighttime operation) of the AM Engineering section of the above referenced application, in response to an e-mail from staff dated March 3, 2008. Specifically, the value of the augmentation of the 76° radial of the presently licensed nighttime directional antenna pattern is corrected from 299.81 mV/m to 229.81 mV/m.

No other changes to the previously submitted application have been made.

The field ratios for the proposed nighttime antenna pattern have not been amended, as the values proposed are mathematically and electrically equivalent to those of the licensed nighttime pattern.
