Scranton, PA 18503

Ref: W241BB FM Translator co-locating with existing FM station WCIG

Dear Mr. Fitzgerald,

The coaxial transmission line which will be used to feed the proposed W241BB antenna and that passes through the aperture of the WCIG antenna was included in the original pattern study for the WCIG antenna. This transmission line was located on the inside corner of the southwest tower leg along with two other 7/8" lines and various 1/2" transmission lines.

If you have any additional questions please don't hesitate to call.

Sincerely,

A handwritten signature in blue ink, appearing to read "Douglas A. Ross".

Douglas A. Ross  
President
