

WEMG(FM) Crete, Illinois
Form 314
BALH-19970609A7

EXHIBIT B
ASSIGNER'S DUOPOLY EXHIBIT

The WEMG city-grade contour (70 dBu) intersects the city-grade contours (70 dBu) of WYCA(FM) Hammond, Indiana, and WYBA(FM) (Formerly WEJM) Lansing Illinois.

Section 73.3555 of the rules provides that in a market with between 15 and 29 (inclusive) commercial radio stations, a party may own, operate, or control up to 6 commercial radio stations, not more than 4 of which are in the same service.

The attached overlap study identifies 20 commercial stations (including WYBA, WYCA and WEMG) with tower sites located within the market study area. By virtue of the location of their transmitter sites, each station serves the market area with a city-grade contour signal.

As there are at least 20 stations serving the market, this proposed FM/FM/FM combination would create no undue concentration of ownership and is permissible under Section 73.3555 of the rules.

FM Study for: WYCA

FCC Database Date: 5/97

41-37-50

Location: HAMMOND, IN

Class: B

87-31-40

These are approximate contours. If overlap is small or close then a more detailed study may be required. *Indicates close contours
