Subject: WPDN Channel 24 STA 20110525AAV

If the FCC will grant BDISDTL-20100301AAB, then we no longer need STA 20110525AAV. The only difference is the STA called for an 8 bay antenna and the displacement application has a 16 bay antenna for more gain, but no change in pattern, direction, or coverage. If the FCC will grant BDISDTL-20100301AAB, we can permanently move WPDN to digital.
