RE: Antenna Orientation  
ERI Model LP-4E-DA  
FCC Antenna Structure Registration Number 1049448  
At KPLC Television Station in Lake Charles, La.

Dear Mr. Wynn

Morrison Surveying, Inc. worked with technicians installing the referenced Antenna, at KPLC Television Station, on Thursday, June 14, 2018, for McNeese State University/KBYS Radio.

Based on our observations and communications with technicians, this letter serves as certification to the installation, of the referenced Antenna, with the Tower Mounting Legs being oriented on an Azimuth of 12°33'05" from True North and the Antenna Bay being oriented on an Azimuth of 102°33'05". The center of the radiating height, above ground level is 383.8-feet. The ground elevation at the tower base is 14.8-feet, NAVD88 Vertical Datum. This information is to the best of my knowledge true and correct as of the date of the field survey.

J. David Morrison, P.L.S.  
La. Registration No. 4649  
Morrison Surveying, Inc.
