## **K277BU STATEMENT IN SUPPORT CHANGE FROM CHANNEL 277 TO 276**

September 9, 2012  
CSSI Non Profit Broadcasting  
K277BU Mineral Wells, TX FID# 153820

K277BU is CO-Channel with KESN, Allen, Texas; a 100 KW station with a large listener base in Weatherford, and Mineral Wells, Texas. Station Staff have received many listener complaints by phone calls from KESN listeners receiving interference from our translator. As a result, we have suspended broadcast operations on K277BU and now file an Application to change Channel.

KDMX, Dallas, Texas channel 275 is also 100 KW, first adjacent to channel 276. Our study and finding of terrain shielding supports a move to channel 276 with the transmitter site located at the present licensed site removes the issue of interference.

In addition to this Application for Minor Modification, we are requesting at the same time an STA to allow operation at variance pending process of this Application.

The statements made are true and correct to the best of my knowledge.
