Mr. Kenneth Manri
Maranatha Ministries/Joy Communications
950 Tilton Road, Suite 101
Northfield, NJ 08225

Dear Mr. Manri:

SURVEYOR'S STATEMENT OF ANTENNA ORIENTATION

This statement is regarding the installation of a three-bay low power FM directional broadcast antenna for station WJPG Radio 88.1 FM mounted on an existing broadcast tower owned by CTI Towers (Site No. 10609) and located in Middle Township, NJ on Lot 125 Block 12.01 at 1575 Route 9 North.

Conover Jackson Surveying LLC established primary control points at the tower site using survey grade dual frequency Global Positioning System (GPS) receivers. Ground measurements were made of the existing tower and installed FM antenna mounting hardware. Optical observations were made of the three installed antenna bays along an azimuth line relative to Geodetic (True) North.

The findings of the surveyor are that **each of the three bays of the installed antenna are oriented to 95 degrees True Azimuth within a tolerance of one degree of arc, plus or minus.**

I hereby declare that the above statements are true and accurate to within the tolerances stated.

Yours Respectfully,

Mark A. Conover PLS
