## **Radiofrequency Compliance Statement W226BT - Orlando, Florida**

On March 9, 2016, a Radiofrequency Radiation survey was conducted at the transmitter site of W226BT, located on the 31<sup>st</sup> floor of the Sun Trust building in downtown Orlando, Florida. The survey was conducted utilizing a NARDA model 8718 RF Survey Meter, serial # 7009 with a Model A8742D Isotropic Shaped Frequency Probe, serial # 02016. The measurements were made throughout the entire area of the radio suite. Measurements were made with all installed RF equipment in normal operation. All measurements were found to be within the limits set forth in FCC OET BULLETIN 65 – SUPPLEMENT A “Evaluating Compliance with FCC Guidelines for Human Exposure to Radiofrequency Electromagnetic Fields”.

During the survey all access was found to be secure preventing any access to areas where the Radiofrequency Radiation would be above the level deemed safe to the general public.
