## **COMPREHENSIVE TECHNICAL EXHIBIT**

**Application for Minor Modification of Construction Permit**  
**K28JU-D, Facility ID 167610**  
**FCC File Number BDCCDTT-20061020ADA**  
**Central Wyoming College**

**Application for Minor Modification of Construction Permit.** The within filing seeks a change of location, ERP and antenna pattern. It is being moved due to effective loss of its traditional transmitter site. Its 51 dBu F50,90 contour enjoys significant overlap with that of the the underlying construction permit; service is to the same community as presently.

**Move concurrent with license for parent/companion analog channel.** This filing is made concurrently with that for K22BK, licensed to the same community. Both are moving together from tower #1010026, Wilkins Peak, to tower #1009408, White Mountain, both at Rock Springs, WY.

**Interference Analysis.** The following is submitted as an OET 69 Longley-Rice study exhibit for the above-captioned application as performed by the Techware, Inc. FCC interference analysis program on a Sun Blade computer. The study demonstrates compliance with §74.793 as applicable.
