Hello Ms. Lott:

Thank you for contacting me about the discrepancy you noted on the pending application for WPCM, Burlington NC. I assume this application is one that we recently tendered for coordinate correction.

As you noted, the WPCM night system RF antenna current is incorrect as submitted. For the licensed night power of 0.055 kilowatt, with antenna impedance of 88 ohms, the correct current value is **0.79 Amps**.

I understand that you can make this correction without requiring an amendment. Please let me know if you need further information.

Again, thank you for letting us correct this discrepancy.

Sincerely,  
Allen Sherrill  
Vice-President/Engineering  
Carolina Radio Group, Inc.
