**Re: Antenna Survey: WKSX FM site at 9388 South Palmer Rd., Dayton, Ohio 45424.**

**Latitude: 39°53'02.4" (NAD 83)**  
**Longitude: 84°04'16.7" (NAD 83)**

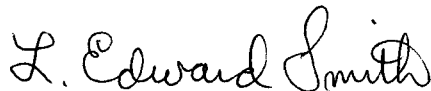

**Gentlemen:**

On October 1, 2009 the tower face and the antenna orientation were located by a field survey on the aforementioned project. A traverse point was set off the east side of South Palmer Road on the 120 degree azimuth line based on true north originating from the existing western tower leg and bisecting the southeastern tower face..

Occupying said traverse point with a survey instrument and observing the recently attached antenna it was determined to be directly in line with the western tower leg and thus on the 120 degree azimuth line.

If you have any questions, or need additional information, please give me a call.

**Sincerely,**

**L. Edward Smith, P.L.S.**
