The proposed facility is 2nd adjacent to WMGM, in Atlantic City. WMGM puts a 60.61 dBu signal at the tower site. The attached spreadsheet shows that, using the specified antenna, the 100.61 dBu F(50,10) interfereing contour does not touch the ground. The attached aerial photo shows that no tall buildings are in the neighborhood, wihich might lift potential listeners into the contour. Thus no population can receive the interference, and the applicant requests a no-population waiver.
