COMPREHENSIVE TECHNICAL EXHIBIT

**MINOR MODIFICATION TO CONSTRUCTION PERMIT
W05CL, FCC ID 130465
FCC FILE NUMBER BNPTVL-2000829APS
PRISM BROADCASTING NETWORK, INC.**

Application requesting displacement relief. The within application is filed as a displacement modification of construction permit, seeking a change of channel to channel 25. The construction permit suffers 77% interference from licensed facility W05CJ, FCC ID 125642, FCC file number BLTVL-20041221AAQ. Accordingly, displacement relief to change channel in order to properly serve its city of license, Key West, is sought by this application.

Change of tower location. Because the tower on which the original application was placed was removed in 2003 and is thus unavailable to the facility, it seeks relocation to a site just 0.5 km west in the same community. The Grade A contour of the within application enjoys significant overlap with the corresponding contour of the underlying construction permit.
