

Exhibit 19

Compliance with CFR 73.525

The proposed FM station is located within the protected 47 dBu of TV station WCSH, channel 6, Portland, ME. The applicant cannot meet the requirements set forth in CFR 73.525. However, after speaking to Dave Munde, the chief engineer for WCSH, we have learned that WCSH has changed to channel 44 to comply with digital television requirements. WCSH continues to operate channel 6 analog. WCSH intends to broadcast analog until February 2009. The applicant respectfully requests a waiver of CFR 73.525 based on the fact that WCSH channel 6 analog will be going silent in February 2009. The applicant asks that the construction permit be granted with the condition the applicant will not build until WCSH 6 analog goes dark in Feb 2009.

***Footnote: below is the email confirming information in above waiver request**

Subject: RE: HDTV

Our plan is to stay on UHF 44 for DTV and to stop using channel 6 in 2009.
