

EXHIBIT 2 & 9

FCC302-FM

Station KSRC

Kansas City, MO.

Special Operating Conditions

September 20, 2001

Compliance With Conditions of Construction Permit

Infinity Radio License Inc. (Infinity), licensee of Station KSRC(FM), Kansas City, MO. is required, per the terms of its Construction Permit, to assure that it has not caused any adverse effects to the pattern of AM station KCTE.

The tower is a new installation with several antennas being installed and in various states of completion. Measurements were made prior to the tower construction and installation of the KSRC and other's antennas by consultant Clarence Beverage. Final measurements will be made after the completion of installations of other licensee's antennas. The results of the final measurements will be submitted to the Commission upon completion. Infinity was advised that a computer study, performed by the consulting firm represented by Clarence Beverage, indicated that there would be minimal if any adverse effects on the KCTE pattern.
