

Compliance with 73.1692

Introduction

47 C.F.R. 73.1692 requires a broadcast licensee or permittee proposing to mount a broadcast antenna on an AM station tower or that proposes construction within 3.2 kilometers of an AM directional station, is responsible for ensuring that the construction does not adversely affect the AM station.

Discussion

The facility proposed in the instant application is located approximately 3.1 kilometers from WJJG 1530 Elmhurst, IL (FIN 32227).

Because the proposed facility is to be collocated with an existing radio broadcaster on an existing pole mounted on the rooftop of a high-rise building, Educational Media Foundation (EMF) believes it is unlikely there would be any measureable adverse effect on the operation of WJJG-AM.

Conclusion

EMF, therefore, respectfully requests that the Commission waive the requirements of Section 73.1692 as the proposed facility relates to WJJG-AM.
