I hereby certify that the following data was determined from an actual survey made on the ground by persons working under my direct supervision.

The Azimuth staked on the ground on February 17, 2017 for the antenna installation was based on GPS observations related to a “True North” Geodetic orientation. Two points were set 180° 00’ 00” (North Azimuth) from the south tower leg for proper orientation during construction and visually checked on March 27, 2017.

THANK YOU,

Henry A. Kuehlem, RPLS
