

**WMPB Channel 29  
Baltimore, MD  
RF Exposure Statement**

The facility proposed in this application is for post DTV transition operation and will replace both the current analog and digital facilities. The current analog facility operates with an effective radiated power (ERP) of 646 kW on channel 67 on a nearby tower while the current digital operation on channel 29 has an ERP of 14 kW. The new DTV facility will operate on channel 29 utilizing the current antenna but with an ERP of 42.6 kW. An RF exposure study indicates that the levels on the ground in the vicinity of the tower will be well below the acceptable limits. In addition, with the termination of the nearby analog facility the overall RF radiation in the vicinity of the tower will be reduced. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
