Dear, Mr. Peck

Emmis broadcasting is filing a 346 form for a minor change in K38EC. We want to change from no offset to a zero offset as requested by Three Angel's Broadcasting Network. They are changing their transmitter location on Sandia Crest. They predict some interference with our signal which can be corrected by K38EC going to a zero offset. They have agreed to cover our costs for doing this. Thank you.

Stephan Laughrin
