**RE: WWCU ANTENNA LOCATED AT BALSAM IN JACKSON COUNTY, NC**

**Dear Mr. Warner:**

Today one of my field crews performed the layout of the above referenced antenna as shown on the attached drawing by Shively Labs drawing AGF040628-001. We layed out a base line off of the east face of the tower in a North/South direction based upon True North and from that layed out three lines one in the 180 degree azimuth, one in the 140 degree azimuth and one in 100 degree azimuth for your construction crew to use for installation of the antenna upon completion of installation we field verified the asbuilt directions and found them to be installed as designed.

I certify that I am a Professional Land Surveyor licensed in the State of North Carolina and that this work was performed under my supervision.

**J. Randy Herron, Professional Land Surveyor**
