Re: **Notification of temporary discontinued operation, KDNR**

Dear Mss Dortch:

Western Inspirational Broadcasters, Inc. (WIBI), licensee of noncommercial educational FM broadcast station KDNR, South Greeley, Wyoming hereby informs the Commission that station KDNR, Facility ID 84104, has been silent since March 24, 2014 while the damaged coaxial feed line to the antenna is replaced. We anticipate resuming full power operation when this project is completed. The station has suffered a failure of its antenna system believed to be caused by energy radiating from a co-located AM broadcast facility. The operation of the co-located AM facility has caused holes to be burnt in the outer jacket and outer conductor of the KDNR coaxial feed line.

Respectfully Submitted,

William L. Hurne
Chief Engineer
Western Inspirational Broadcasters, Inc.
