## **LPFM SECOND ADJACENT CHANNEL WAIVER STUDY**

Grand Rapids, MI  
Channel 279L1 (103.7 MHz)

Based on a study performed by Michelle Bradley of REC Networks, it has been determined that this proposed site qualifies for a second adjacent waiver as specified in Section 73.807(e) of the Commission's Rules.

Station WVGR, Grand Rapids, MI (Facility ID # 66309) operates on Channel 281B and is located 38.1 km from the proposed LPFM site. WVGR operates a 96 kW into a directional antenna with a 0.976 field value towards the proposed LPFM station therefore, 91.35 kW is radiated towards the proposed LPFM station. The height above average terrain in the direction of the proposed LPFM is 217.5 meters. As a result, WVGR places a 72.9 dBu F(50, 50) service contour at the proposed LPFM site.

The proposed LPFM station will operate from a radiation center of 60 meters above ground level which places the radiation center at 38 meters above average terrain. In order to meet the maximum service requirements of §73.811(a) of the Commission's rules, the applicant is proposing to operate 0.064 kW ERP.

Using the U/D method<sup>1</sup>, we have determined that the prohibited overlap goes as far as the 112.9 dBu F(50, 10) interference contour of the proposed LPFM station. Using the free-space method and with an ERP of 64 watts, the contour is measured at 127 meters from the radiation center of the antenna. The proposed LPFM station will utilize a 1-bay Nicom BKG-77 circularly polarized antenna. Based on manufacturer's data using the depression angle method, a 64-watt signal would produce a 112.82 dBu contour at 40 degrees below the horizon at an artificial point of 3 meters above ground level. There are no tall buildings immediately adjacent to the tower.

Therefore, based on the information presented, REC submits that the proposed LPFM station will not create any interference to existing or potential listeners of second adjacent channel stations WVGR. The applicant requests a waiver of §73.807(c) in respect to WVGR.

Report completed by  
Michelle Bradley
