To whom it may concern

On March 3, 2010 I submitted the Proof of Performance Report for KENC, licensed to Estes Park, CO. Unfortunately, I made a mistake calculation the power gain of the antenna. I enter the wrong unit pattern gain when calculating the total gain of the antenna system so the stated gain of the antenna was in fact slightly over twice what it should have been.

I have made the correction to the unit power gain of the antenna shown in Figure 4 and have made the correction to the total gain of the antenna on paragraph 2 of page two and I have made the correction to the elevation pattern Figure 3.

Respectfully submitted
