

**Exhibit 21**

**WFLI-DT, Cleveland, Tennessee (Fac. ID No. 72060)**

On behalf of Meredith Corporation (the “Licensee”), licensee of WFLI-DT, Cleveland, Tennessee (the “Station”), and pursuant to Section 73.1635 of the Commission’s rules, we hereby respectfully request Special Temporary Authority (“STA”) for the Licensee to operate its digital facilities for the Station with parameters at variance from the Station’s license. *See* FCC File No. (BLCDT-20050808AGH).

The Licensee previously filed a letter with the Commission explaining that the Station is operating at reduced power due to transmitter failure. Specifically, the failure was determined to be in the transmission line. Despite diligent efforts, the Licensee has not been able to repair the transmitter yet. The Licensee continues to work diligently to repair the Stations’ transmitter, and anticipates a return to full power operation within six months. The Licensee therefore requests STA to operate the Station at an effective radiated power of 250 kW.

A grant of the STA would serve the public interest by allowing the Station to continue to serve its community of license. This STA request is accompanied by the requisite filing fee of \$160.00.
