

EXHIBIT E-2
ENVIRONMENTAL STATEMENT
K296FV HONOLULU, HAWAII
KONA COAST RADIO, LLC
FEBRUARY 2008
FCC FORM 349

The proposed operation of K296FV will radiate only 10 watts Effective Radiated Power both Horizontal and Vertical polarization.

Because the total ERP from the proposed operation is less than 100 watts, it is categorically exempt from environmental processing.

The Permittee, Kona Coast Radio, LLC certifies that it will cooperate with tower personnel and other users of the tower to either reduce power to safe operating levels or cease transmissions while maintenance is performed on the tower.

The applicant assumes full responsibility for remedying the complaints of blanketing interference for a period of one year. With the low proposed ERP, 10 watts, no blanketing interference issues are anticipated. Plus this area is very remote and not populated.
