

## **INTERFERENCE CERTIFICATION**

Applicant has utilized the latest version of Comstudy 2.2.12.29, an engineering software program, to ascertain possible interference concerns. This program computes both contour and Longley-Rice interference. Having completed those computations, there was no interference found other than the following:

WGEM-TV	0.46%
WILL-DT	0.04%
KMBC-TV	0.17%
WILL-TV	0.41%

These are within the Commission's established standards for permitted interference. Consequently, this application may be granted.
