

Exhibit 12
K250AE Channel 250D Longview, Washington
Allocation Study

The attached spacing study shows the spacing between the proposed fill-in translator site and the location of cochannel and adjacent channel stations, proposals, and allotments. This study was made with the Commission's Class A spacing requirements, and individual situations were examined to determine the lack of prohibited contour overlap per the requirements of §74.1204 of the Rules. The attached allocation study map demonstrates compliance with the Commission's Rules for protection of FM broadcast stations and translators as outlined in §74.1204.
