Re: KITT(FM), Soda Springs, Idaho
Facility Identification Number: 17436
Tri-State Media Corporation
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed March 16, 2006, on behalf of Tri-State Media Corporation ("TSM"). TSM requests extension of the special temporary authority ("STA") granted on September 9, 2005, to operate Station KITT from a site other than the licensed site.¹ In support of the request, TSM states that it has not yet been able to locate a new, permanent site for the station.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KITT may

¹ Station KITT is licensed for operation on Channel 261A (100.1 MHz) with effective radiated power ("ERP") of 3 kilowatts (H only), and antenna height above average terrain ("HAAT") of -84 meters. Construction Permit BPH-20040114ADO authorizes an upgrade to Class C2, relocation of the transmitter, and operation with ERP of 50 kilowatts (Max-DA, H&V) and HAAT of 107 meters.

continue to operate with the following facilities:

Geographic coordinates:	42° 37' 48" N, 111° 41' 00" W (NAD 1927)
Channel	261 (100.1 MHz)
Effective radiated power:	0.1 kilowatt (Max-DA, H&V)
Antenna manufacturer and type:	Scala, CA5-FM/CP, directional
Antenna orientation:	70° True
Antenna height:	
above ground:	15 meters
above mean sea level:	2140 meters
above average terrain:	352 meters

It is anticipated that an application for construction permit for permanent relocation of the station will be filed prior to the expiration date below. TSM must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **September 28, 2007**.

Sincerely,

Charles N. Miller, Engineer
