In re: W280ED, New Bern, NC
BPFT-20120406AAT
Facility ID # 148018

Dear Applicant:

This refers to: (1) the above-captioned application for W280ED, New Bern, North Carolina.

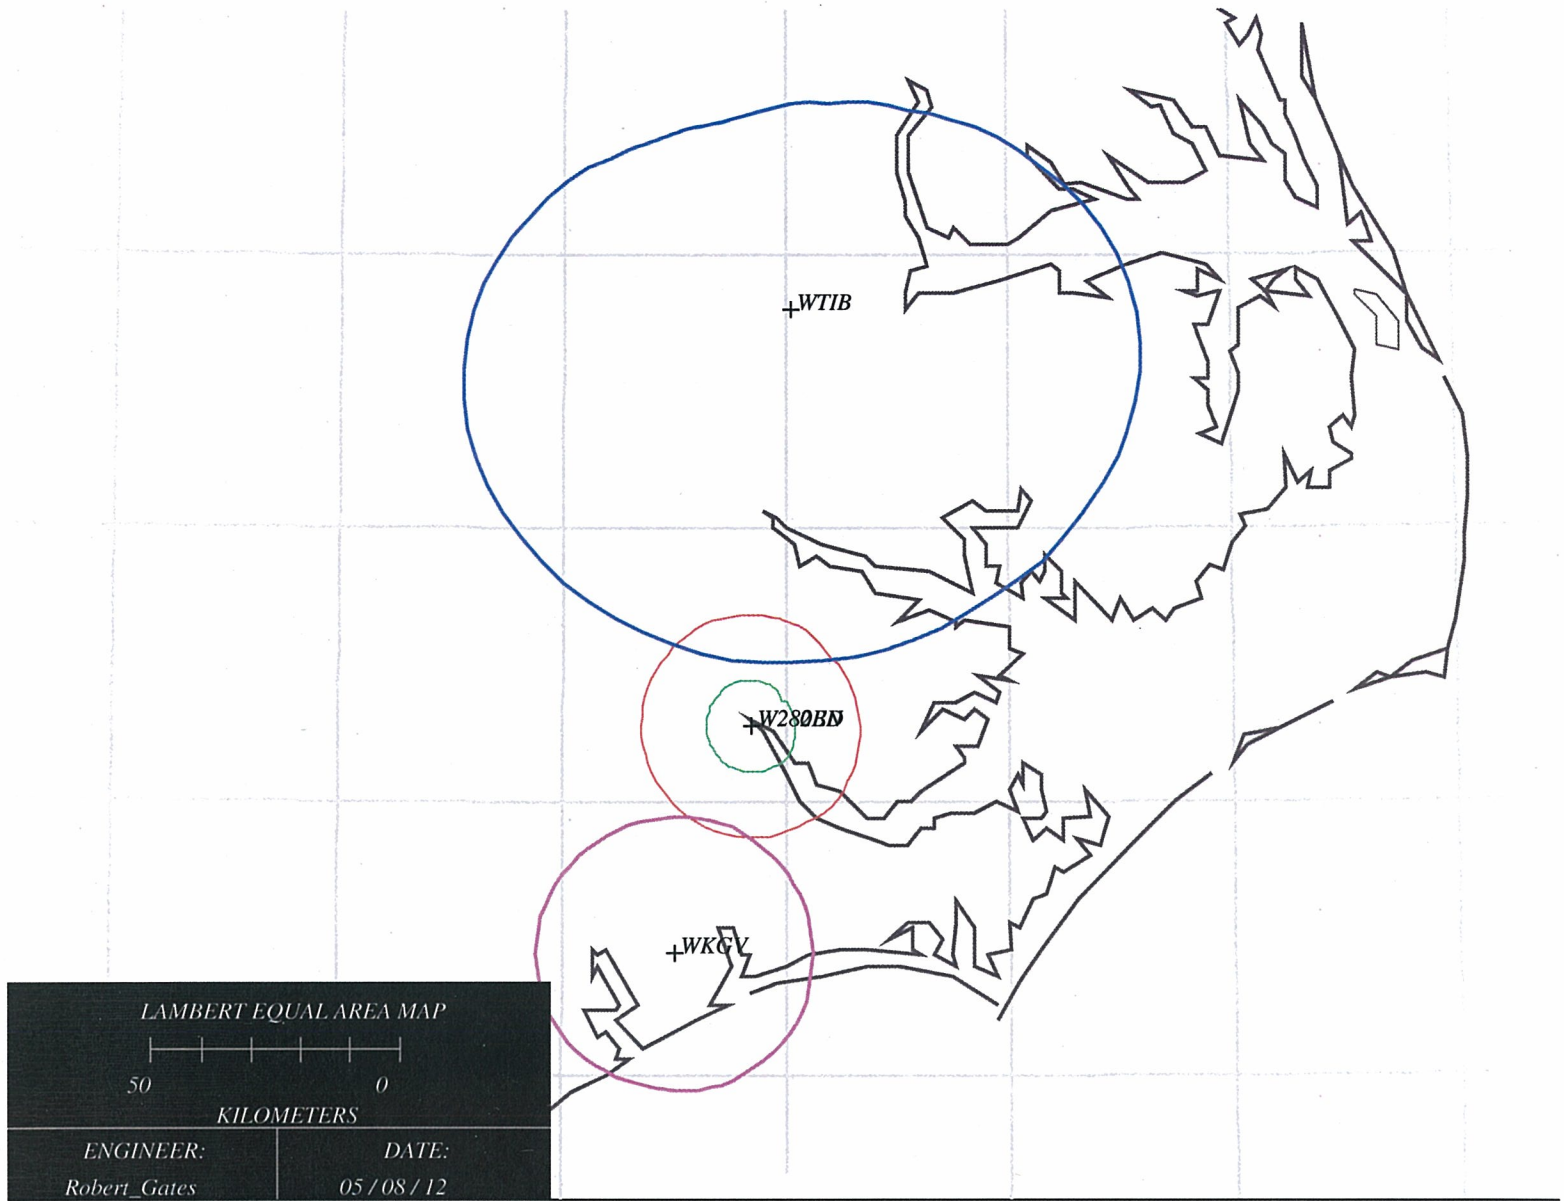

An engineering study has revealed the application violates 47 C.F.R. § 74.1204(a) with respect to WTIB(FM) (BMLH-20101022AAA) and WKGV(FM) (BMLED-20111005AIU). Section 74.1204(a) states that an application for a FM translator station will not be accepted if the proposed operation would involve prohibited overlap of predicted field strength contours with any other authorized station. The proposed 54 dBu interference contour overlaps with the 60 dBu protected contours of WTIB(FM) and WKGV(FM). This violation was not addressed.

In light of the above, the application BPFT-20120406AAT filed by CTC Media Group is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw
Deputy Chief
Audio Division
Media Bureau

No topographic data is available for this location.

A1 - Number of radials where free space equation was used for field strength calculations.

A7 - Number of radials where a HAAT less than 30 meters was adjusted to 30 meters.
