ATLANTIC COAST COMMUNICATIONS, INC

LICENSEE OF W26CE CHANNEL 26

APPLICATION FOR A DIGITAL FLASH CUT ON CHANNEL 26

**FCC FILE Nos. BLTTL-20010927ABF
BSTA-20070821AEJ**

ENGINEERING EXHIBIT 11

FACILITIES REQUESTED

ATLANTIC COAST COMMUNICATIONS, INC. (ACCI), is filing this long form application to request authority for a construction permit to flash cut W26CE on Channel 26, with an effective radiated power of 1 kW (DA), (H) at the same location as W26CE is currently operating under FCC STA No. BSTA-20070821AEJ.

Pursuant to FCC Public Notice, DA 06-123 and Rules regarding digital LPTV stations, this office, with assistance from Techware, Inc., has completed a Longley-Rice analysis of the proposed digital operation on TV Channel 26 with an ERP of 1.0 kW, a “Stringent” channel filter per 74.794, and utilizing the existing Bogner BU8S directional antenna oriented to 200 degrees and that study shows that no prohibited interference will occur to any other authorized or pending full service and LPTV analog or digital station as required by 74.792 and 74.793. The results of the Longley-Rice Study can be supplied to the staff if needed.

CONCLUSIONS

By using the FCC recognized Longley-Rice terrain model and receiver antenna directivity, we have shown that the instant proposal for DTV operation on CH 26 meets

the requirements for a flash cut operation for W26CE, Channel 26 and we believe that this proposal for flash cut DTV operation of W28CE on Channel 26 should be GRANTED.
